E15-373T FEMTOLASIK FLAP SPATULA

all titanium
delicate pick (0.15mm Ø , 1mm long)
and a curved spatula (12.5mm long; tip 0.15mm Ø, 1mm long),
overall length 13.0 cm

to open and manipulate the flap

E15-374T FEMTOLASIK FLAP SPATULA

titanium handle with stainless steel working parts:
delicate pick (0.35 mm Ø, 1.5 mm long)
and curved spatula (12.3 mm long),
overall length 13.0 cm

for finding the flap and to undermine it perpendicular

E15-372T THORLAKSON LASIK FLAP-LIFTER

titanium handle with stainless steel working parts:
round tip (0.25 mm Ø) and ball tip (0.8mmØ),
overall length 13.0 cm

used to lift flaps created with a femtosecond laser

E15-376T BOONE FEMTO SPATULA

delicate titanium pick (1.25 mm long) and
stainless steel Slade spatula (9.8 mm long),
overall length 13.0 cm

used to open main and side port incisions created by the femtosecond laser.
Tip is flat, but not sharp, so the incisions are opened without increasing
the wound size.

OLIVIERI-CANTERA ADJUSTABLE EYE SPECULUM

E40-100C stainless steel
E40-100TC titanium made

Solid blades with ideal curvature for accommodating
pivoting microkeratomes.

E15-375T FEMTOLASIK FLAP SPATULA

titanium handle, with stainless steel working part:
curved 60° spatula blade (10 mm long with a jag on the tip 0.8 x 1.0 mm wide),
overall length 11.5 cm

delicate spatula to detach and open the flap edge

E15-377T ZALDIVAR FEMTOLASIK FLAP SPATULA

titanium handle, with stainless steel working part:
curved spatula blade (12 mm long with tip 0.5 mm wide),
overall length 11.5 cm

delicate spatula to detach and open the flap edge

E15-378T DONNEFELD (SLADE) FEMTO SPATULA

titanium handle, with stainless steel working part:
curved spatula blade (9.8 mm long with flattened tip
1.4 mm long, 0.45 mm wide), overall length 11.0 cm

ideal to open femtosecond created cataract incision, to identifying and entering the interface and opening the wound with a sweeping motion.

E15-379T DONNENFELD (SLADE) FEMTO SPATULA

titanium handle, with stainless steel working part:
curved spatula blade (9.8 mm long with flattened tip 1.25 mm long, 0.3 mm
wide), overall length 11.0 cm

ideal to open femtosecond created cataract incision, to identifying and entering the interface and opening the wound with a sweeping motion.

E15-380T SLADE FEMTO FLAP SPATULA

titanium handle, with stainless steel working part:
curved, extra delicate spatula with thinner and longer tip,
overall length 11.5 cm

to manipulate the flap, to open easily incisions which cannot be opened with traditional femto spatulas.

E30-572T AKAHOSHI HYBRID COMBO PRECHOPPER

cross-action, round handle, blunt ring tip 1.6 mm Ø,
max. opening 3.2 mm, overall length 12.0 cm

designed for completing separation of nucleus after initiation by femtosecond laser.
